

Aluminum Pipe Sizes ----->

Stainless Pipe Sizes ----->

Measurement starts at left edge of paper, not at #1.

-----> Cut here on perforated line ----->

Don't like holes in your boat?

Use this ruler to measure your upright, angled, and horizontal pipes for Cuda's Customs *Clamp-on* Holders.

Simply print it, cut on dotted line, and wrap it around pipe.

Measurement starts on left edge of paper. Measure circumference of pipe from the ***left edge*** of paper wrap around pipe and where left edge of paper lines up with the red numbers is your pipe size. Find your number and measurement on our website by clicking on the [products page](#) then on the [size](#) drop down list. The red ruler numbers are listed in front of each pipe size. Go to www.cudascustoms.com or call us at (855) 777-CUDA.
